Smart Home Website Requirements

Smart Homes is a real estate organization that deals with managing, renting, selling, and buying homes and properties.

They decided to scale up their business and reach more potential customers by creating an online presence(website).

You are employed as the web designer and required to build a website having the following features.

1. A nav section that contains: the logo/company name

                                       Home   About us   properties   services   career   contact-us button.

2. The home page should have:

       i. A hero section that gives a brief and clear description of what we do.

       ii. A section that displays some properties we manage.

       iii. A section that shows reasons why customers should patronize us.

       iv. A section that shows testimonials from past customers.

       v. The Footer section should have navigational links, back-to-top links, the physical office address, and social media handles.

3. The About Us page should have a nav bar and footer section just like the homepage. It should also contain our vision and mission statement, and why we do what we do. contact us form should be available on this page, likewise, the picture of the CEO and some top managers should be included.

4. The properties page should include pictures of different categories of properties we manage, sell, rent, and buy. It should also have the nav bar and footer section like the home page

5. The services page should have different sections explaining in detail what we do (manage, buy, sell, rent/let). It should also have the nav bar and footer section like the home page

6. The career page (something like "we are hiring kind of page") should have a registration form for people who want to be employed as agents.

7. The Contact Us button should lead us to the About Us page where the contact form is.

This website should be built using HTML and CSS and must be Responsive so that it can be viewed from any screen type and size.

Use nice colors that blend well and good-quality images.
